In compliance with the US Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA), 40 CFR; Part 763 an asbestos re-inspection and management plan update was conducted of the schools for asbestos containing building materials (ACBM).

The inspection, findings and asbestos management plan updates (response actions) are on file in the administrative office located at St. Mary's Schools.

The EPA requires us to perform re-inspections of the asbestos materials every three years. During the spring of 2017, an accredited asbestos inspector performed these re-inspections.

An accredited management planner review and update will be provided and included in the three year inspection report.

Recommended Response actions assist in management of "in place" asbestos containing building materials (ACMB).

The results of the re-inspections and management plan updates are available for your review and comments.

Everyone is welcome to view these anytime during normal school hours.

Regards,

Adam Cormier
President
St. Mary's Schools
